

Welcome to Your Beijing Adventure

www.our-beijing.com

Hello and thank you for choosing to experience Beijing beyond the expected with us! We understand that traveling in China can be challenging, so we've created this clear guide to ensure you won't get lost finding us. Let's embark on this exciting journey together!

There are 3 parts to this document:

Part 1: Traveling by Taxi

Part 2: Traveling by Subway

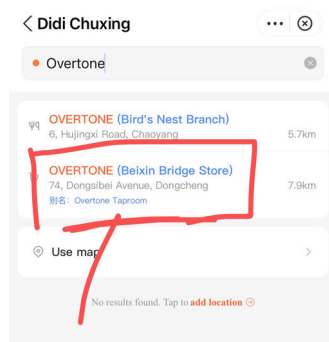

Part 3: Traveling by Yourself

Part 1: Traveling by Taxi

When traveling by taxi, ensure you have **Alipay** downloaded and set up to order your taxis. Although you might think it's easy to flag down a taxi on the street, it's quite difficult these days. Most people use apps to call taxis, so the ones you see might simply drive by. If you're left with no option, look for taxis that are yellow and either blue or green, sometimes purple.

Part 1A: Using Didi Travel Via Alipay

- **Type in:** Overtone & select the option with 'Beixin Bridge Store' (see screenshot below)

Part 1B: Show Your Hotel or Ask for Assistance

- **Address for the Taxi:** 北京市东城区东四北大街74号
Show your hotel concierge or ask someone to call a taxi for you and provide the driver with this address.

Part 2: Traveling via Subway (Metro)

- **Destination Station:** Beixinqiao Station (Line 5 - the Purple one)
- **Exit:** C

Directions:

1. Turn right as you leave the subway until you hit the main road.
2. Turn left (do not cross over the road).
3. Walk about 300 meters until you reach Overtone.
4. Look up when you see some slightly taller buildings; you'll find "Overtone" written two floors up on the side of the building.

The screenshot below is of the route you will walk from Beixinqiao subway Exit C to Overtone.

If you're unsure how to get in (see images below), just stay outside. We will continuously check to see if anyone has arrived yet. 😊

Part 3: Travelling By Yourself

So maybe you're already wondering around the area or you are staying close-by so you will find your own way. Firstly to make navigation much easier in China, make sure to download **Amap**. For a guide on how to use it and change it to the English version, check out our blog: [The Best Map App for Traveling in China](#). **DO NOT** use **GoogleMaps** & **DO NOT** use **WhatsApp** location share. These two apps are officially banned so they are very often very inaccurate. Apple maps is ok, but Amap is the one which is best and will help you not get lost.

Once you've changed your Amap into English, you can type Overtone and select the Beixin Bridge Branch option as seen below in the screenshot.

We look forward to welcoming you and wish you an awesome adventure exploring the exciting city of Beijing!
